SARDAR NEFT — STATEMENT OF PURPOSE

A procurement channel between *qualified buyers and reputable refinery supply sources.*

Sardar Neft is an Oil & Gas Procurement Company and mandate company serving customers seeking access to reputable refinery supply programs.

We create and build flexible and transparent procurement processes for our respective customers. Our role is to facilitate a structured connection between qualified buyers and reputable refinery supply sources while maintaining appropriate documentation, verification and transaction procedures.

We focus on access, verification, quality, risk management and transaction coordination.

ON OUR ROLE

Sardar Neft operates as a procurement and mandate company. Our role is not to present ourselves as a refinery or producer.

Sardar Neft is not a refinery.

OUR ACTIVITIES

01 Oil and gas procurement

02 Refinery supply access

03 Mandate services

04 Buyer coordination

05 Transaction management

06 Market management

07 Risk management

08 Quality coordination

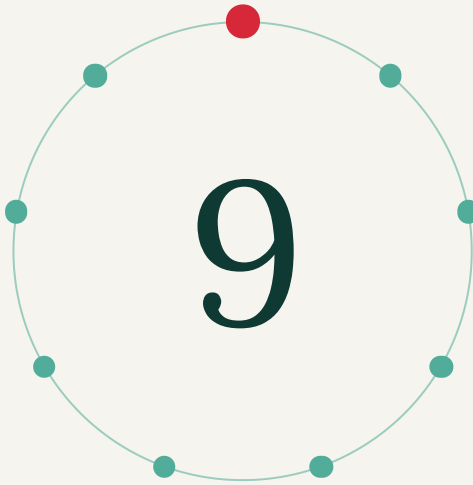

The company in four facts.

Product lines

Petroleum and energy products in the procurement portfolio, subject to availability and refinery allocation.

Defined stages

From the buyer's requirement to delivery, under a clearly defined procurement process.

BUSINESS	NOT	BASE	FOCUS
Oil & gas procurement and refinery mandate services	A refinery or producer	Kyzylorda, Kazakhstan Syrdarya Microdistrict, 77a, kv. 5	Access · verification · quality · risk management · transaction coordination

Four disciplines around *every* transaction.

01

Risk Management

We assess and mitigate risk associated with the procurement process, such as supply chain disruptions or quality issues.

02

Market Management

We gather and analyze specific market and industry information. This is used to understand customer preference and to make informed business decisions.

04

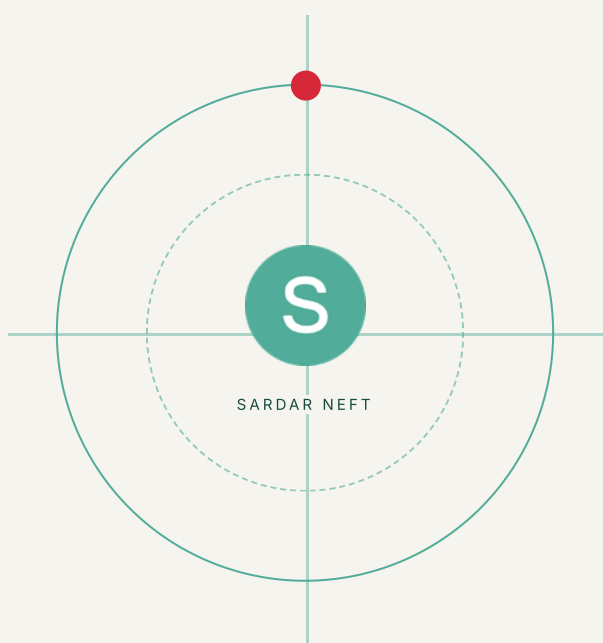

Procurement

We support customers in navigating structured procurement procedures and connecting with reputable refinery supply sources.

03

Quality

We select suppliers that offer high-quality goods to meet the buyer's standards.

04 BUSINESS ACTIVITIES

Procurement, access *and coordination.*

Sardar Neft provides oil and gas procurement services for customers seeking access to reputable refinery supply sources.

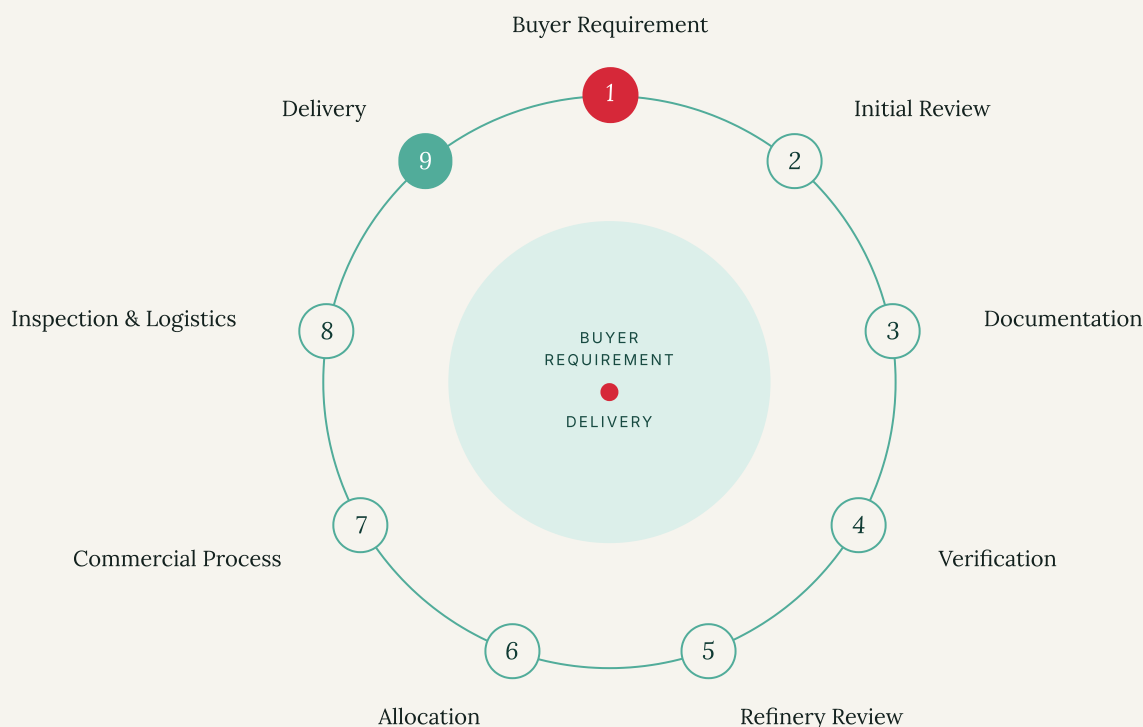

01	Oil & Gas Procurement	Sardar Neft provides oil and gas procurement services for customers seeking access to reputable refinery supply sources.
02	Refinery Access	Sardar Neft works with reputable refinery supply sources and provides qualified customers with a structured channel for procurement.
03	Mandate Services	Sardar Neft operates as a mandate company to reputable refineries.
04	Supply Coordination	Oil and gas procurement does not end with product availability.
05	Transaction Management	Every oil and gas transaction requires appropriate coordination between the buyer, seller, refinery, terminal, inspection company, logistics providers and other relevant parties.
06	Market Intelligence	We gather and analyze specific market and industry information.
07	Risk Management	We assess and mitigate risk associated with the procurement process, such as supply chain disruptions or quality issues.
08	Quality Management	We select suppliers that offer high-quality goods to meet the buyer's standards.

Fourteen product lines.

Procurement access across petroleum and energy products — from middle distillates and aviation fuel to gas, petrochemicals and crude.

MIDDLE DISTILLATES EN590 Diesel EN590 10ppm Sulfur content max. 10 mg/kg (10 ppm)	MIDDLE DISTILLATES GO50 Diesel Gas Oil 50ppm Sulfur content max. 50 mg/kg (50 ppm)	MIDDLE DISTILLATES LCO Light Cycle Oil FCC middle-distillate stream	AVIATION A-1 Jet Fuel A1 Kerosene-type turbine fuel; freezing point max. -47 °C
GASOLINE R98 Gasoline RON 98 Research Octane Number (RON) 98	GASOLINE R95 Gasoline RON 95 Research Octane Number (RON) 95	GASOLINE R92 Gasoline RON 92 Research Octane Number (RON) 92	FUEL OIL D6 Virgin Fuel Oil D6 Heavy residual fuel oil
FUEL OIL M100 Mazut M100 Heavy fuel oil, grade M100	HEAVY PRODUCTS BIT Bitumen Grade specified by buyer (e.g. 60/70)	GAS LNG·LPG LNG / LPG Liquefied gas — specialised logistics	PETROCHEMICALS MeOH Methanol Purity specified by applicable standard
CRUDE CRUDE Crude Oil API gravity and sulfur content by grade	MARINE MGO Marine Gas Oil Distillate marine fuel	AVAILABILITY All products are subject to availability, refinery allocation and applicable transaction requirements.	SPECIFICATION Defined by the applicable refinery or supply source and agreed in the transaction documentation.

Nine stages, one closed loop.

01

Buyer Requirement

The buyer submits the required product, quantity, destination and transaction requirements.

02

Initial Review

Sardar Neft reviews the submitted requirement to determine whether it corresponds with an available procurement opportunity.

03

Documentation

Required buyer and transaction documentation is submitted for review.

04

Verification

The applicable information and documentation are subject to verification and due diligence.

05

Refinery Review

The qualified transaction is presented to the applicable refinery or supply source.

06

Allocation

Subject to approval and availability, the refinery allocation is confirmed.

07

Commercial Process

The transaction proceeds according to the applicable commercial procedure.

08

Inspection & Logistics

Applicable inspection, storage, transportation and delivery requirements are coordinated.

09

Delivery

Product delivery proceeds according to the agreed transaction terms.

● An allocation should not be considered confirmed until the applicable refinery or authorized supply source has completed its required approval and confirmation process.

Assurance at each stage.

Verification

Sardar Neft supports a structured verification process designed to reduce transaction risk.

- Corporate verification
- Counterparty verification
- Documentation verification
- Supply verification
- Transaction verification

Quality

Products are assessed against applicable specifications and buyer requirements. We seek to work with reputable supply sources.

Where applicable, independent inspection companies may be appointed to conduct quantity and quality verification.

Risk

Our approach considers:

- Supply chain disruptions
- Product quality
- Documentation
- Transaction procedures
- Counterparty requirements
- Logistics, delivery and commercial requirements

Our corporate governance framework supports responsible decision-making and provides appropriate oversight of our business activities.

Integrity

Accountability

Transparency

Responsibility.

STRATEGY

Centered around providing superior service, fostering strong relationships, and staying at the forefront of industry trends.

- 1 Client-centric approach**
Understanding the unique needs and goals of each client, and building long-lasting partnerships.
- 2 Expertise and industry knowledge**
Staying current with industry trends, market changes and regulatory developments.
- 3 Innovation and technology**
Using technology and tools to streamline processes and improve efficiency.
- 4 Integrity and transparency**
Conducting business with high ethical standards and transparency.
- 5 Growth and expansion**
Exploring new markets, developing new services and expanding our client base.

A structured approach to procurement.

We prioritize customer satisfaction above all else. We strive to deliver exceptional service and exceed our clients' expectations.

01

Direct Procurement Access

Access to reputable refinery supply programs through established mandate relationships.

02

Structured Transactions

A clearly defined procurement process designed to establish the requirements of each transaction.

03

Verification

Appropriate documentation and verification procedures are applied throughout the procurement process.

04

Transparency

We provide a transparent transaction process to enable the buyer and seller to connect while reducing unnecessary delays, risks and loss of funds.

Let's discuss your *procurement requirement.*

For oil and gas procurement inquiries, refinery access, mandate relationships and qualified supply requirements.
